Ali Zeinodin

C++ / Qt Developer | Cross-Platform Desktop Applications

Tehran, Iran alizeinodin79@gmail.com github.com/alizeinodin linkedin.com/in/ali-zeinodin t.me/alizeinodin

Open to Qt projects
Qt · QML · C++

PROFESSIONAL SUMMARY

Software engineer with 6+ years of experience and hands-on focus on desktop apps using **C++, Qt Quick, and QML**. Built Bu-Ali Chess end-to-end: OOP engine, C++/QML bridging, animated UI, file persistence, and Linux/Windows packaging. Proven at delivering complex systems in Agile and turning domain rules into clean UIs.

Qt Quick / QML | C++ OOP | Signals & Slots | Q_PROPERTY | CMake / qmake | Cross-platform | Material UI

QT-FOCUSED TECHNICAL SKILLS

Desktop UI	Qt Quick, QML, Qt Quick Controls 2, Material Style, animations, audio/visual feedback
C++ / Qt	OOP & polymorphism, exceptions, QObject, qmlRegisterType, bidirectional C++ ↔ QML
Tooling	Qt Creator, qmake, CMake, Git, packaging & release for Linux and Windows
Engineering	Architecture design, clean code, modularity, debugging complex systems, technical docs
Also	JavaScript (in QML), PHP/Laravel, Python, Docker, MySQL, Linux

FEATURED QT PROJECT

Flagship **Bu-Ali Chess — Desktop Chess Application** 2021 · Score 173/100

C++ + QML/Qt Quick · Bu-Ali Sina University · github.com/alizeinodin/Chess-Game

- OOP game engine (Piece, Cell, Board, Player, Game) with polymorphic piece behavior.
- **Connection** bridge via **Q_PROPERTY**, signals/slots, and qmlRegisterType.
- Advanced rules: check/mate, castling, en passant, promotion, special-move undo, threat scoring.
- 5-screen Material UI, ListView for captured pieces, animations, file save, Linux/Windows builds.

IMDB Practice — Domain Modeling in C++ 2021

C++ · github.com/alizeinodin/imdbpractice — IMDB-like domain structures with OOP modeling focus.

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer — Hamrahe Aval (MCI) 2024 – Present

- Architecture and backend delivery for a large-scale SOAR/VMS cybersecurity system (microservices/modular).
- Complex feature delivery in Agile with clean code and security — transferable to production Qt work.

Software Engineer — Bu-Ali Sina University Aug 2023 – Jul 2024

- Led design of a university telephony system integrating legacy PBX; backend with Laravel and Neo4j.

Backend Developer — LanGeek Jul 2023 – Apr 2024

- Built/refactored language-learning services (NLP module, picture dictionary) with clean, scalable code.

EDUCATION

Associate of Science, Computer Software Engineering — Bu-Ali Sina University · Head TA (Database Systems) · Advanced Programming project (Qt Chess)

Seeking: Qt/QML desktop projects (internal tools, operator panels, Windows/Linux apps). Portfolio: Bu-Ali Chess.
